Sec. 66-2 Operation of vessels in restricted areas

- (a) *Definitions.* The following words, terms and phrases, when used in this section, shall have the meanings ascribed to them in this subsection, except where the context clearly indicates a different meaning. If any definition is inconsistent with the definitions in F.S. § 327.02, the definition in F.S. § 327.02 shall take precedence.

Idle speed - no wake means that a vessel must proceed at a speed no greater than that which will maintain steerageway and headway. At no time is any vessel required to proceed so slowly that the operator is unable to maintain control over the vessel or any other vessel or object that it has under tow.

Marker means any channel mark or other aid to navigation, information or regulatory mark, isolated danger mark, safe water mark, special mark, inland waters obstruction mark, or mooring buoy in, on, or over the village controlled waters or the shores thereof.

Motorized vessel means any vessel equipped with machinery for propulsion, irrespective of whether the propulsion is in actual operation.

Operate means to be in charge of or in command of or in actual physical control of a vessel upon the village controlled waters, or to exercise control over or to have responsibility for a vessel's navigation or safety while the vessel is underway upon village controlled waters, or to control or steer a vessel being towed by a vessel upon village controlled waters.

Person means an individual, partnership, firm, corporation, association or other entity.

Slow Speed Minimum Wake and *Slow Speed* may be used interchangeably and means that a vessel must be fully off plane and completely settled into the water. The vessel must then proceed at a speed which is reasonable and prudent under the prevailing circumstances so as to avoid the creation of an excessive wake or other hazardous condition which endangers or is likely to endanger other vessels or other persons using the waterway. At no time is any vessel required to proceed so slowly that the operator is unable to maintain control over the vessel or any other vessel or object that it has under tow.

Steerageway means the minimum rate of motion required for the helm of the vessel to have effect.

Swim Area means a designated area wherein all vessels of any type are prohibited from entering the marked area.

Vessel means every description of watercraft, barge, and air boat, other than a sea plane on water, used or capable of being used as a means of transportation on water.

Vessel-exclusion zone means an area from which all vessels or certain classes of vessels are excluded.

(b) *Prohibited activities.* It shall be prohibited for any individual to operate a motorized vessel at a speed greater than four knots or in a manner which creates a wake, in the following restricted areas:

- (1) Within an area designated and marked as an idle speed - no wake zone;
- (2) Within 300 feet of a "diver down" flag; or

- d. Completely off plane and which has fully settled into the water and is proceeding at a reasonable and prudent speed with little or no wake is proceeding at this speed.

(2) The following described waterways or portions of waterways is hereby established as Slow Speed Minimum Wake zones on a creek, stream, canal, or similar linear waterway if the waterway is less than 75 feet in width from shoreline to shoreline:
